EXPERIENCE

Bxld Space, Istanbul, Turkey

Core Developer

May 2022 - September 2022

- Supervised Unity game development process and revised the project.
- Integrated Unity game to Blockchain.
- Owned the development of the company landing page.
- Onboarded and led multiple developers.

Crossover, Austin, TX

Software Engineer

July 2021 - September 2021

- Worked with a team of software engineers in an agile environment.
- Fixed bugs across multiple platforms such as mobile apps, websites, and databases.

PROJECTS

Fruit Festival

July 2022

Fruit Festival is a slot machine web application that runs on Avalanche Testnet. I've used NextJs and ChakraUI for the front end. I've developed a slot machine smart contract on Solidity and used Chainlink to handle on-chain random number generation. I utilized Moralis to handle the web3 connection and web3.js to communicate with the smart contract I deployed.

SKILLS

- C | C++ | C#
- Solidity | Hardhat
- Moralis | Web3Js
- Javascript | React | NodeJs | NextJs | Express
- TailwindCSS | ChakraUI | CSS
- Unity
- Java
- Flutter
- Git | Github

INTERESTS

Problem Solving
Game Development
Sci-Fi
Music

EDUCATION

Istanbul Technical University, Turkey, Istanbul -
Computer Science

September 2014 - June 2021
